

The Gallery System picture hanging system

Artward Bound professionally install The Gallery System picture hanging system

The gallery system is a strong flexible picture hanging system which adapts quickly to changing needs. The system is ideal for use in galleries, studios, shops, restaurants and even the home environment.

It is a patented system, designed and manufactured in Australia.

It is made up of 3 items

- Hanging track mounted on the wall
- Track slide and cable that slide into the track and can be easily moved into position from side to side
- Picture hooks that adjust up and down the cables

Artward Bound also sell the parts for the system, so if you need extra hooks and slides, please contact us.

Â

How the system works:

-

The hanging cable is threaded through the track slide and the ferrule stops the cable sliding through

-

By tilting the track slide you can insert the hanging cable into any point along the track

-

Once inside the track tubing, you tilt the track slide back

-

You then let the track slide rest in the track tube, and hang the picture below.

The picture hooks attach to the cable easily.
